## SUMMARY

A highly skilled frontend web developer based in Haryana, India, specializing in React.js for frontend development. Actively advancing proficiency in backend development through ongoing exploration of Node.js and MongoDB. Possessing over four years of freelancing experience, I've served over 200 clients with a focus on video editing, utilizing tools like Adobe After Effects and Premiere Pro. Demonstrating a strong commitment to delivering outstanding results, my track record reflects consistent client satisfaction and project success.

---
